

The figure displays a network graph where nodes represent individual transcripts and edges represent their relationships. The nodes are blue circles, each containing a label such as "transcript48_MGP-PahariEij-G0020237". The labels include transcript IDs and dataset names (MGP-CAROLIEij, MGP-PahariEij, ENSRNOG, ENSMUSG). The edges are thin black lines connecting the nodes, indicating interactions or shared information between the transcripts. The graph shows a complex web of connections, particularly around central nodes like transcript55_ENSRNOG000000031503.
